AI Pulse Belt · Centennial Jing-Zhang AI Innovation Belt

Site Context & Three-Level Planning Scope

01 区位与三级规划范围

Site Context & Three-Level Planning Scope

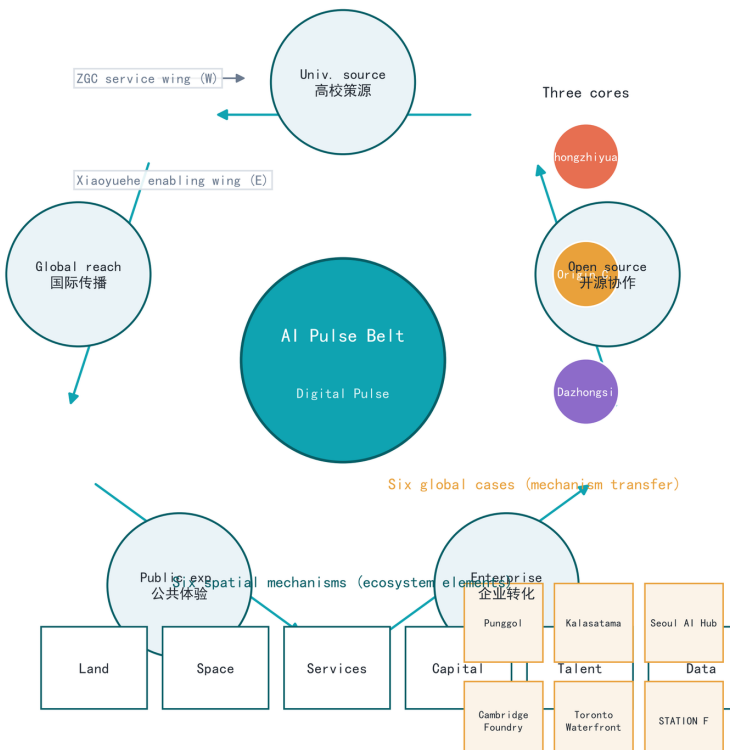

Source: concept map by agent from official pre-announcement areas & provisional boundaries (EPSG:4548) · not official · AI Pulse Belt 2026 · Iteration v9.6 · public-level concept tagging + decoupled provisional disclosure · 2026-08-13

Ecosystem Map & Five-Link Innovation Chain

02 生态图谱与五环创新链（概念建议）

AI Innovation Ecosystem Map (Concept)

Source: agent concept map from public sources and global AI-district practice (six mechanisms, five-link chain) · not official · AI Pulse Belt 2026 · Iteration v9.6 · public-level concept tagging + decoupled provisional disclosure · 2026-08-13

The ecosystem map is built on the five-link innovation chain (university source—open source—enterprise transformation—public experience—global reach)

Conceptual Land-Use Structure

03 总体设计区用地结构（概念建议）

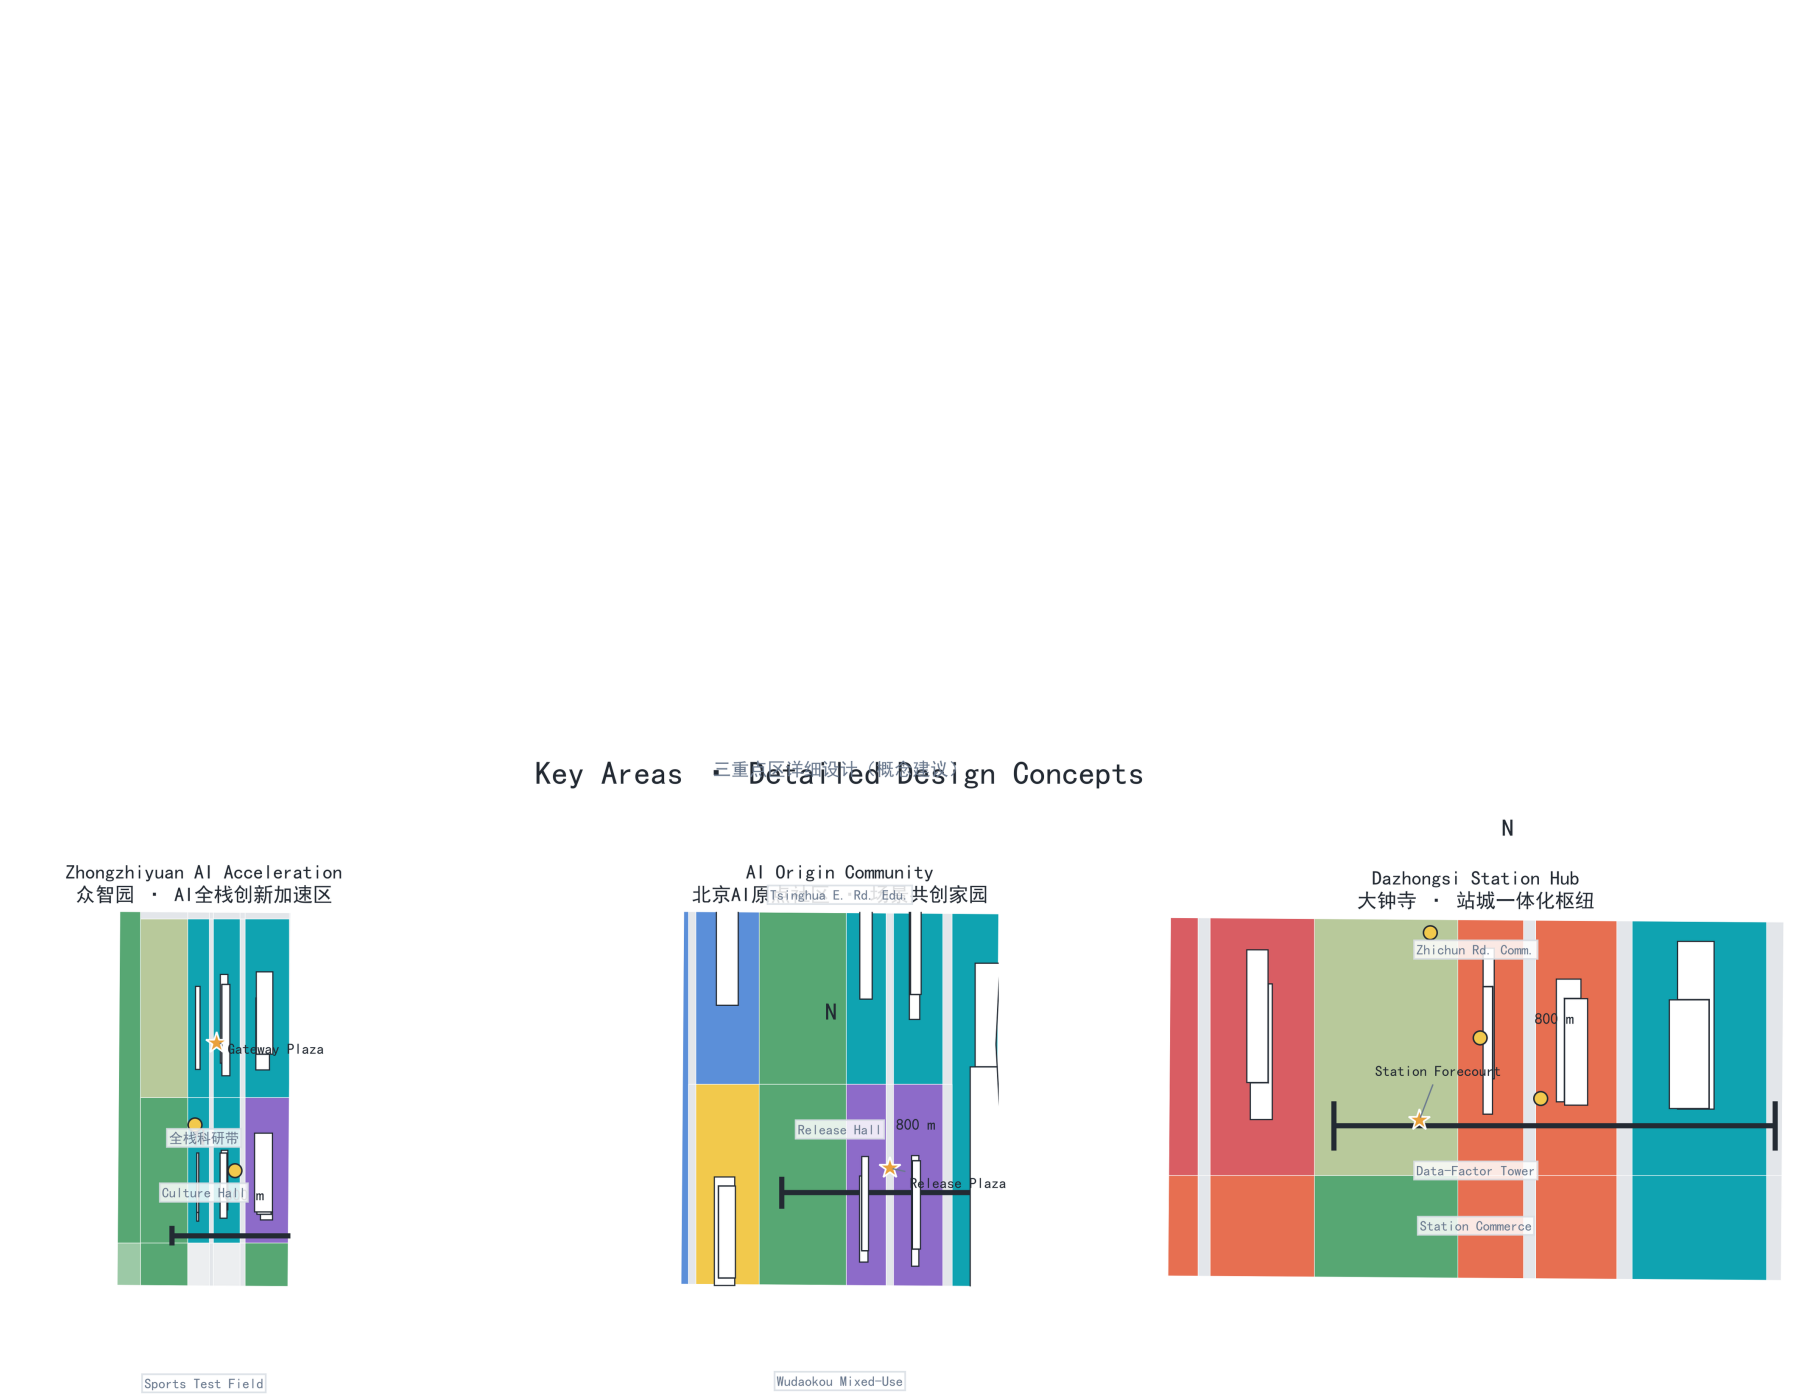

Conceptual Land-Use Structure of the Overall Design Area

Land use is organized along the central 260 m-wide Pulse-Belt greenway: research-led (0802) with commercial (05), cultural and educational support (0803, 0804, 0805, 0806).

Key Areas ▪ Detailed Design Concepts

04 三重点区详细设计（概念建议）

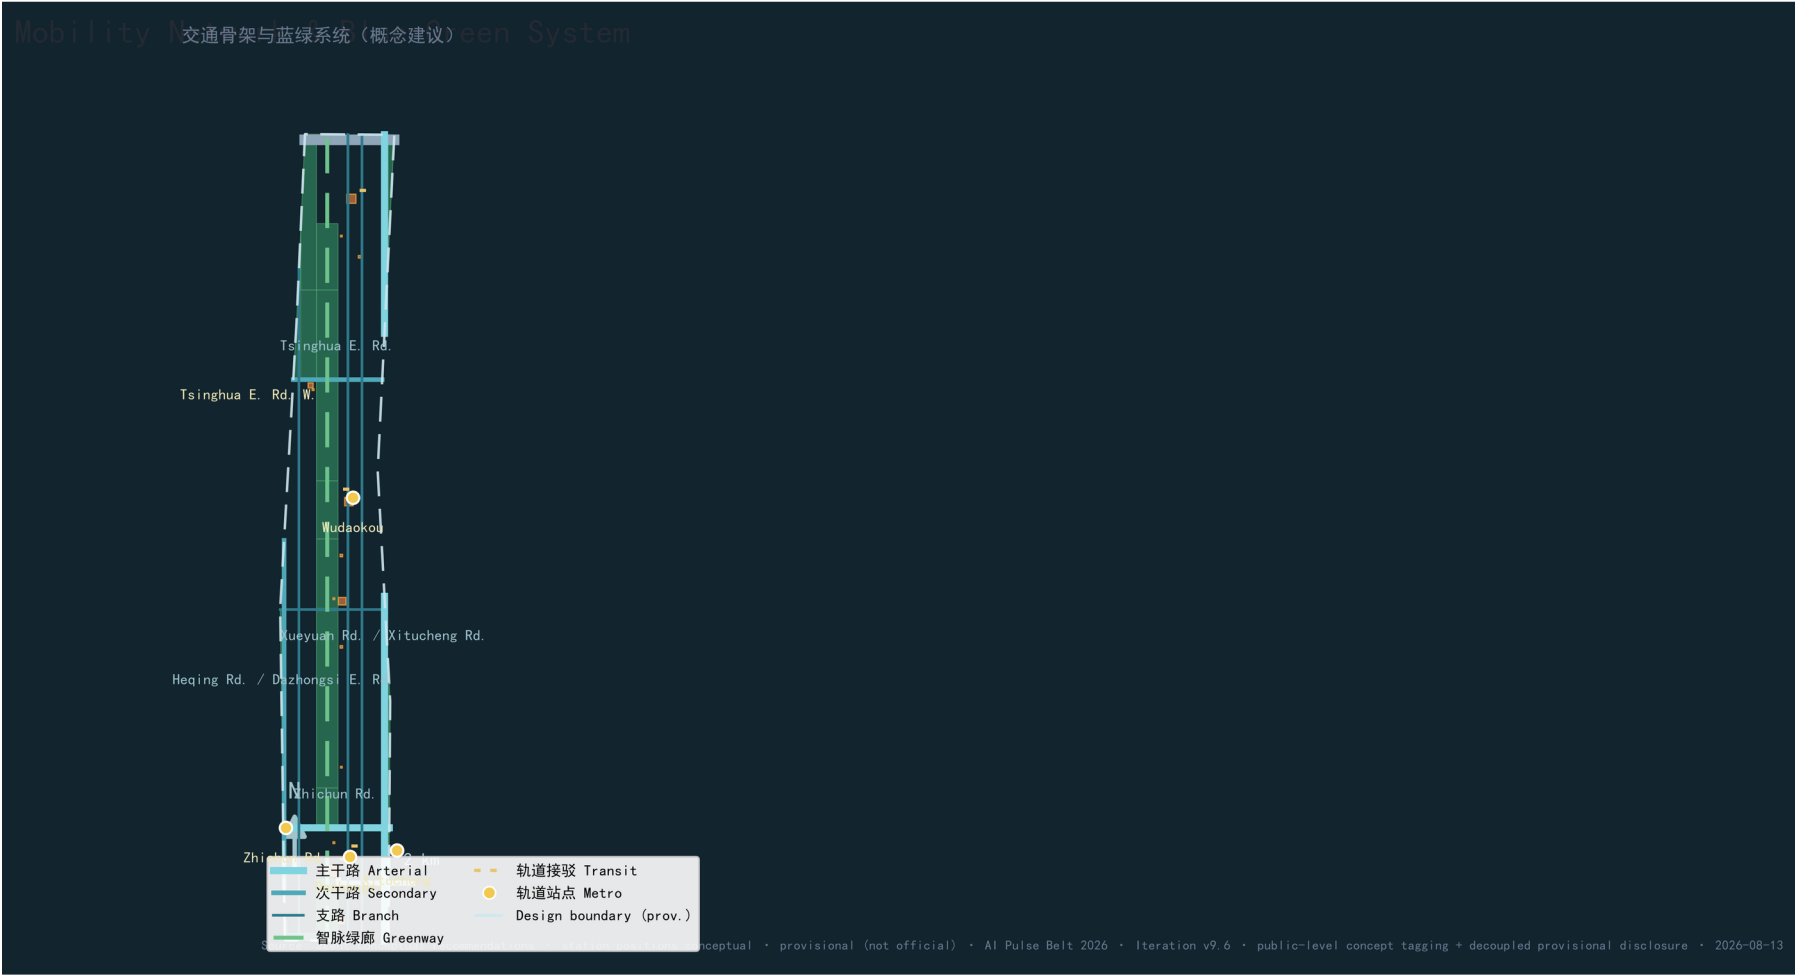

Source: agent conceptual recommendations · ★ scenario/pilgrimage nodes · provisional (not official) · AI Pulse Belt 2026 · Iteration v9.6 · public-level concept tagging + decoupled provisional disclosure · 2026-08-13

Zhongzhiyuan (AI full-stack innovation accelerator) focuses on foundation-model training and open-source ecology; the Beijing AI Origin Community

Mobility Network & Blue-Green System

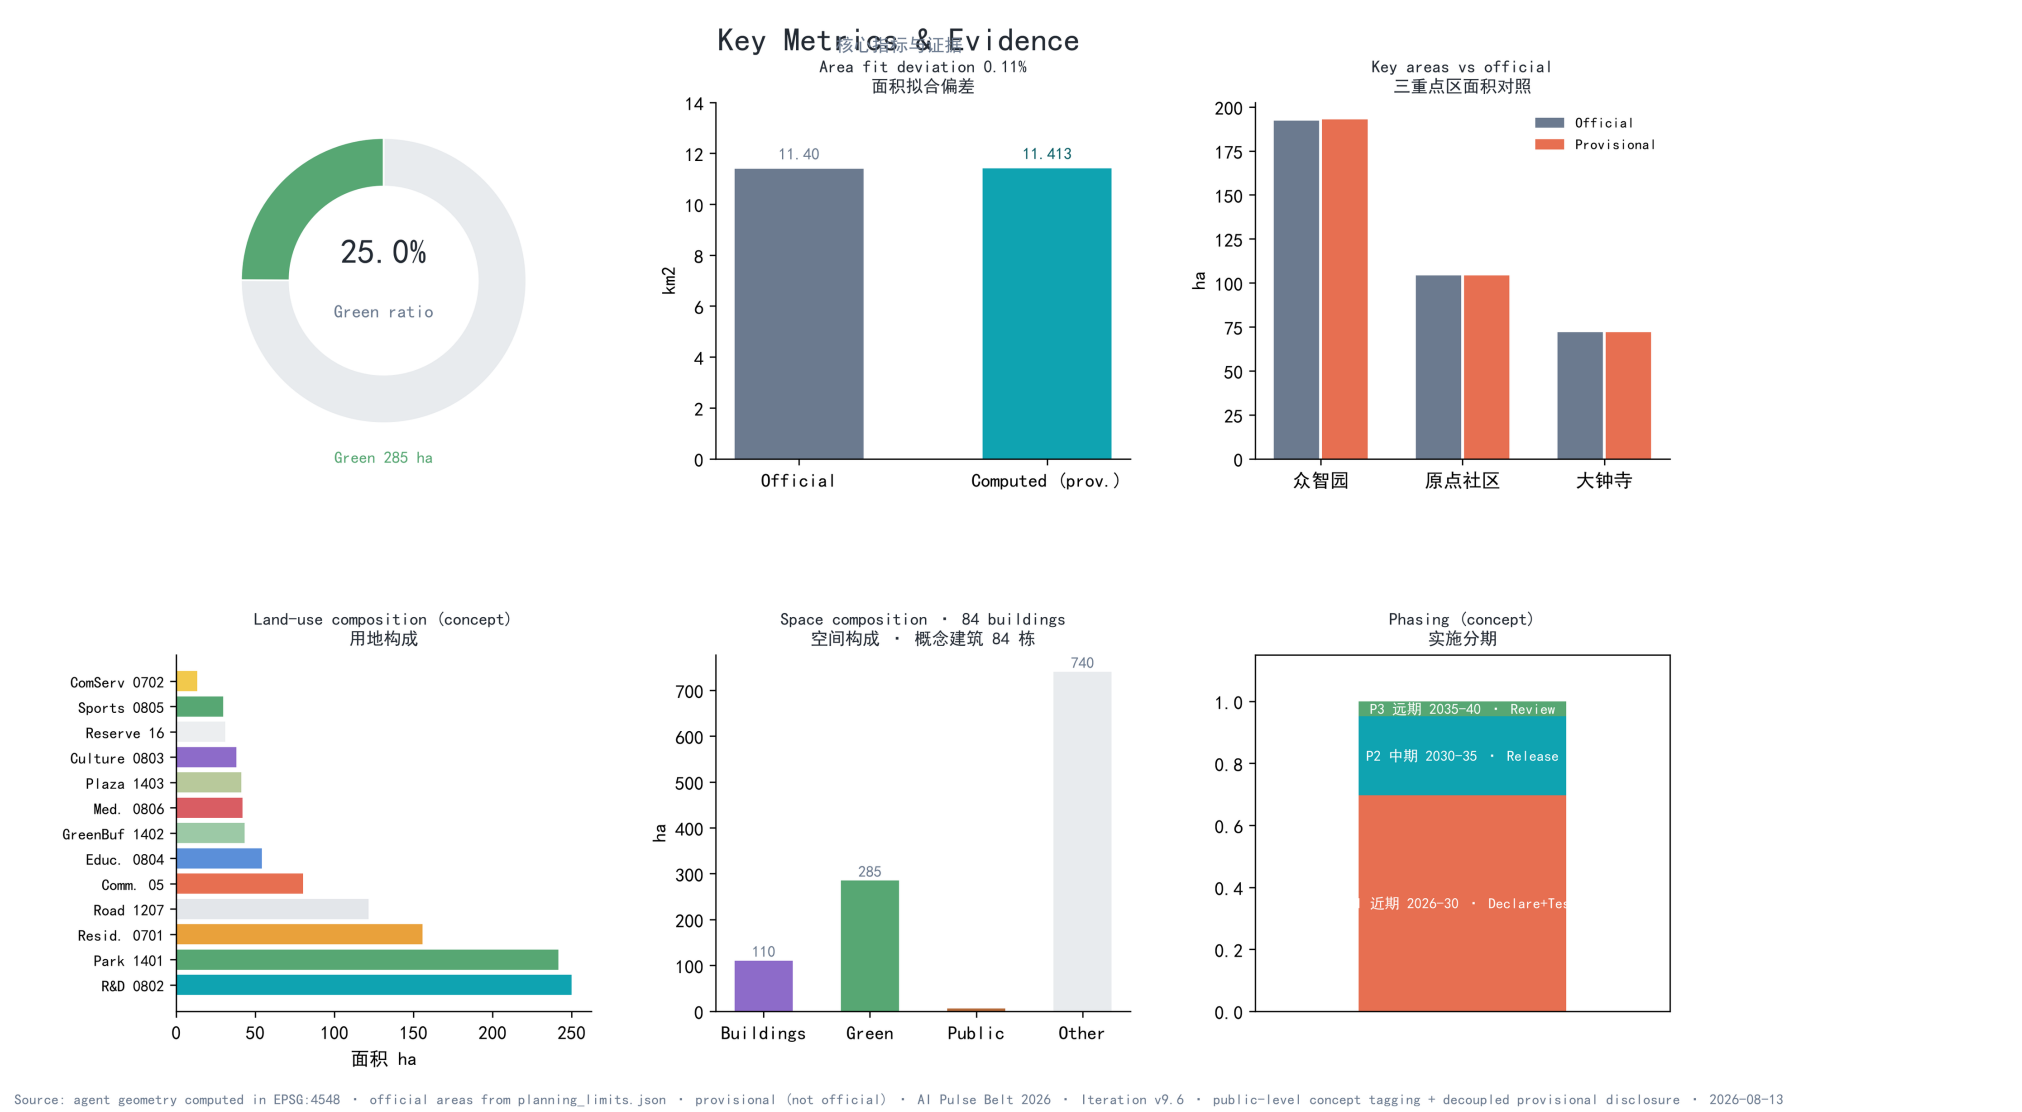

05 交通骨架与蓝绿系统（概念建议）

A three-tier mobility system of rail + smart feeder + slow-traffic greenways; blue-green network with a greenway spine, pocket parks and protect

Key Metrics & Evidence

06 核心指标与证据

Design Notes & Compliance Statement

1. All land uses, buildings, roads, green and public spaces are concept proposals (design_proposal), not official boundaries. No conclusions on FAR, building height, demolition or relocation.
2. All geometry is generated from official provisional boundaries; the 0.11% area deviation (11.413 vs 11.424) is due to rounding. No official_boundary attribute is claimed.
3. Areas computed in EPSG:4548 (CGCS2000 / 3-degree zone); data exchanged in EPSG:4326.
4. Scenario nodes, pilgrimage landmarks and phasing are agent-generated concept suggestions for review.
5. See proposal.md (zh/en) and the 9 matrix JSONs for full argumentation and source lists.
6. This booklet is generated by an AI agent for open-call review purposes only.
7. Iteration v9.6 • public-level concept tagging + decoupled provisional disclosure • 2026-08-13; protocol v1.0.
8. Phases link to Pulse Protocol beats (pulse_class in phasing.geojson): near=declare+test, mid=release, far=finalize. Key-area narrative lines (narrative_line) registered in key_areas.geojson (north=AI future culture, south=existing urban fabric).
