

JING-ZHANG CITY COMPLETENESS v0.12.s

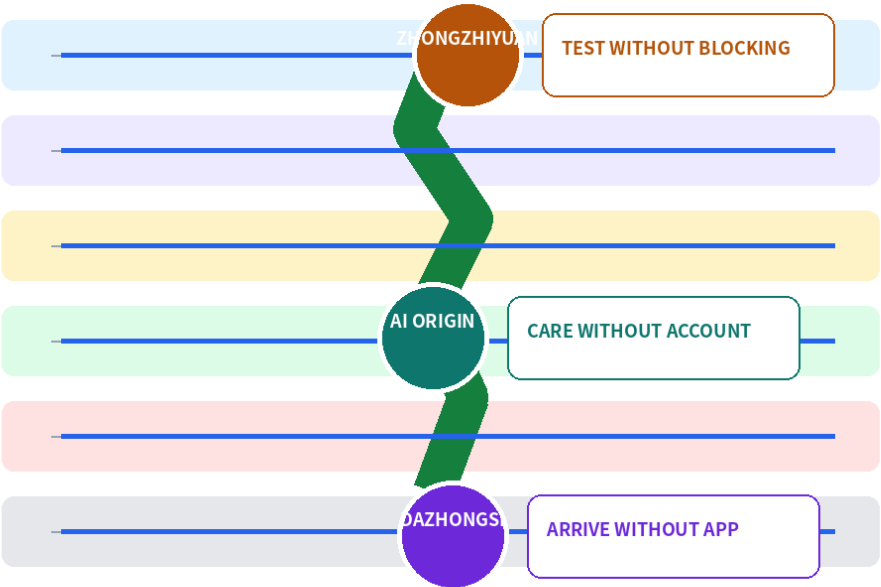

CIVIC FAILSAFE SECTIONS | S0 ORDINARY > S1 ENHANCED > S2 DEGRADED > S3 RECOVERY

v0.12.s | CIVIC FAILSAFE SECTIONS

The city must remain legible and usable when AI, accounts or tests fail. One civic spine links three different contracts and four operating states.

- S0 ORDINARY
- S1 ENHANCED
- S2 DEGRADED
- S3 RECOVERY

ONE SPINE / SIX BANDS / SIX STITCHES / THREE CORES

PROVISIONAL GEOMETRY · RELATIONSHIP DIAGRAM · NOT A STATUTORY OR ENGINEERING ALIGNMENT

CITY AS STATE MACHINE

Each spatial contract is tested through four states. AI may improve service, but it cannot become the only route, service door or operating authority.

- S0 Physical baseline works first
- S1 Optional AI overlay, bounded and reversible
- S2 Human takeover; ordinary task continues
- S3 Re-enable only after public/physical verification

Acceptance target:

3/3 critical tasks remain possible without AI/account/test; 3/3 contracts have manual takeover and rollback.

v0.12.s | THREE CONTRACTS, THREE FAILSAFE SECTIONS

The section changes by urban type; the rule stays constant: ordinary movement and public service survive the removal of AI, accounts and tests.

01 ZHONGZHIYUAN | TEST WITHOUT BLOCKING

02 AI ORIGIN | CARE WITHOUT ACCOUNT

03 DAZHONGSI | ARRIVE WITHOUT APP

v0.12.s | RELEASE GATES + EVIDENCE

Implementation is not a generic timeline. Each AI overlay may advance only after the ordinary city, human stewardship and rollback path are evidenced.

CONCEPT ACCEPTANCE MATRIX

Contract coverage	3 / 3	All key areas bound to one spatial contract
AI-OFF task coverage	3 / 3	Critical task can be completed without AI/account/test
Human takeover coverage	3 / 3	Each contract names a manual takeover path
GO/REVISE/STOP coverage	3 / 3	Each contract has advance, revise and rollback criteria
Official geometry reliance	0	No new bridge/tunnel/station exit or statutory control is invented

FIXED PACKAGE METRICS

SITE AREA	11,412,825.386 m ²
GREEN RATIO	0.195008
PUBLIC-SPACE RATIO	0.033824
GREEN-SPACE AREA	2,225,592.728 m ²
Geometry is provisional. These package-derived quantities are consistency evidence, not statutory controls.	

STATE-BASED CIVIC RELEASE

S0 ordinary city first | S1 optional AI | S2 human takeover | S3 public/physical re-check before recovery

G0 baseline > G1 stewardship > G2 reversible pilot > G3 scale / rollback

ZHONGZHIYUAN / TEST

Ordinary work-rest-walk chain remains continuous.
Proposed role: public-realm + test steward.
STOP / rollback if ordinary route is displaced.

AI ORIGIN / CARE

Basic care/help works without account or data consent.
Proposed role: basic-service + manual takeover.
REVISE if physical/manual fallback is not legible.

DAZHONGSI / ARRIVE

Arrival, orientation and help remain app-independent.
Proposed role: station-city public interface steward.
No invented exit, bridge, tunnel or engineering line.

v0.12.s | THREE CONTRACTS, THREE FAILSAFE SECTIONS

The section changes by urban type; the rule stays constant: ordinary movement and public service survive the removal of AI, accounts and tests.

01 ZHONGZHIYUAN | TEST WITHOUT BLOCKING

ordinary work + food/rest +
green spine

bounded reversible test bay

staffed stop / rollback role

S0 → S1 → S2 → S3

If the test stops, the public route does not move.

PROPOSED ACCEPTANCE: ordinary task remains continuous in every state; responsible legal entity to be confirmed.

02 AI ORIGIN | CARE WITHOUT ACCOUNT

home-to-care-to-commons chain

accountless staffed service door

AI navigation is optional

S0 → S1 → S2 → S3

Refusing data or losing an account cannot remove basic care access.

PROPOSED ACCEPTANCE: ordinary task remains continuous in every state; responsible legal entity to be confirmed.

03 DAZHONGSI | ARRIVE WITHOUT APP

static bilingual wayfinding

staffed help + ordinary
waiting/retail

vertical continuity stays
provisional

S0 → S1 → S2 → S3

No phone is required; no bridge, tunnel or station exit is invented.

PROPOSED ACCEPTANCE: ordinary task remains continuous in every state; responsible legal entity to be confirmed.

v0.12.s | RELEASE GATES + EVIDENCE

Implementation is not a generic timeline. Each AI overlay may advance only after the ordinary city, human stewardship and rollback path are evidenced.
